

GREEN ROOM _April Newsletter

The weather is what we are studying in the green room the first week of April...rain, clouds, wind. We will be painting with rain, making wind wands and wind chimes, and reading about clouds and thunder cake. We will be observing signs of spring and growing seeds. We appreciate things that you and your child bring to share in our Science area. We will be hammering wood in our workshop and constructing wooden sculptures. Our clay has been fired and is ready to paint.

April Events

April 10th: Judson Auction at Solera

April 15th, 21st and 27th: Conferences [no school these days]

April 22nd: Discovery Night 6-7:30pm. Earth Day related and recyclable activities.

*Wood shop: We are looking for volunteers to help watch over the wood working area during our discovery time. Even half an hour would be helpful. Please see Suzanne.

I will be gone on Tuesday the 13th and Wednesday the 14th. Sue and Sandy will be teaching for me these days. I will be back for conferences on the 15th. Everyone has been busy on the playground... collecting rainwater from the down spouts, balancing the new wheel barrels and moving rock around.

Thank you for all your support.
